## Spotlight Series:

### North Florida Spike Alert Bulletins

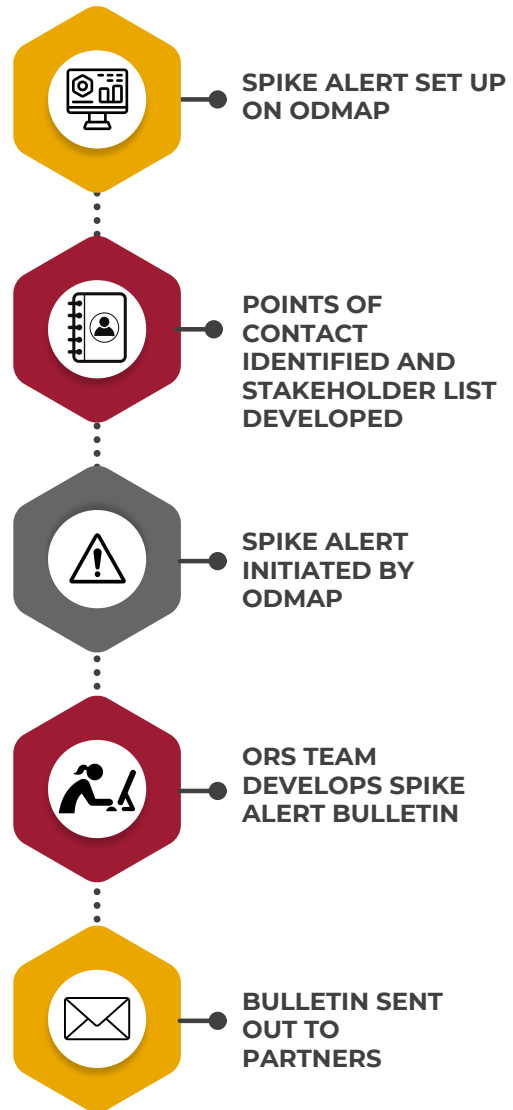

Keep your community aware and prepared

The North Florida High Intensity Drug Trafficking Area (NF HIDTA) Investigative Support Center (ISC) Manager and the North Florida Overdose Response Strategy Team (NF ORS) are working together to create bulletins to send to local law enforcement agencies to raise awareness of suspected overdose in the NF HIDTA area of responsibility.

The NF ORS Team created a list of all law enforcement agencies and implemented their outreach strategy to form a stakeholder contact list. Every time ODMAP generates a spike alert for one of their counties, the NF ORS Team will create a spike alert bulletin. They include an image of the map for the county, an image of the graph with details of naloxone information, as well as a screenshot of a list that shows the incident type, date and time, zip code, and suspected drug type. The NF ORS Team always encourages others to contact them with any questions.

### Spike Alert Bulletin Process

**ODMAP Spike Alert**

**(U//LES) Spike Alert Incident Breakdown**

Incident Type	Count	Percentage
Heroin	15	75%
Fentanyl	5	25%

**Breakdown by Type**

UNCLASSIFIED/LAW ENFORCEMENT SENSITIVE
